---

**Abstract:** Have been investigated the reactions of acylation, bromation of 2-amino-4-phenylsubstituted thiazoles, and also reactions of aminothiazoles with phenylisocyanate, 1,2-epoxy-3-chloropropane, propylene oxide and propylene sulfide.

**Keywords:** 2-amino-4-phenylsubstituted thiazols; 4-phenylthiazolylsubstituted 1,2-aminoalcohols and 1,2-aminothiols; 2-amino-5-brom-4-phenylthiazole; 3-hydroxy-6-phenyl-2,3,4,5-tetrahydropirimido[1,2-b]-thiazoline-4
