Abstract: In this paper we presented flows metal through mineral processing polymetallic lead-zinc in concentrator Stan Terg (Tuneli i pare) in Trepça - Kosovo. Reasonable study this live issue is because in practical processing mineral we have flows metals in flow of Stan Terg. Lost research in metals has an important theoretical but more practical where we need this mines lead zinc with flotation eight years ago restarting production processing. In this base reaches in conclusion for optimal choose processing for decrease losses metal along processing mineral.

Key Words: *lead, zinc, iron, processing flotation, flows metals, ore deposit, Trepça*
