*Received October 18, 2013; Accepted November 14, 2013*

**Abstract:** Recent years have seen the global opening up of institutions of learning to engaging in business enterprises and delivery of products of economic value to the society. This work expounds the need for higher educational institutions in Nigeria to diversify their enterprise portfolio by exploiting waste as a resource of economic value; highlighting the enterprise prospects and benefits to the institutions, while contributing to economic growth and environmental sustainability.

**Keywords:** *Waste Enterprise, Institutional Enterprise, Environment, Business, Nigeria.*
